Multiplication to 10X10

Pirates - Find a Line
Color a line of 3 numbers that can make a multiplication equation.
Multiplication to 100
a game for 2 players
Need: Pencils

Players take turns to color a line of 3 numbers that can make a multiplication equation. The line must be 3 numbers beside each other in a row or column. e.g. A player could color 4, 24 and 6 for $4 \times 6 = 24$. The numbers can be in any order, e.g. 4, 6, 24 or 6, 24, 4. The last player who can color a line of 3 numbers is the winner. One line is colored to show you what to do.

Monkeys Multiply by 7
Roll the dice, add the numbers and multiply by 7.
a game for 2 players
Each player uses a different colored pencil. Players take turns to roll the two dice and add the numbers together. The player then multiplies the total by 7 and colors this number in the game. e.g. if a player rolls 3 and 2, they color 35, down or diagonally.
Need: 2 dice, 2 different colored pencils

Preparing the Games

These are 'Print and Play' games. Simply print the game on paper and it is ready. Players will require pencils to play.

Each game is for 2 players with 2 games provided on each sheet so that the players can play the game twice.

Using the Games

Math Centers – These games are ideal for a math center activity. Have the children read the instructions themselves if possible as this is a great reading comprehension activity.

Display on Smart Board – The games can be projected onto your smart board and the class can be broken into 2 teams to play.

Homework – The games are also suitable for homework. They are a fun alternative to regular homework and parents can be involved in playing the game with their children. This is really popular with the kids and the parents.

Fast Finishers – The games are a perfect activity for those children who finish their work early.

Students as Teachers - A worthwhile activity is to have children learn how to play a game and then teach it to others. Teaching others how to play is a great communication activity.

Buddy Class Activity – Another use for the games is to use them as a buddy class activity. Have the younger students 'teach' their older buddies how to play the game.

PLEASE NOTE: The version with correct spelling for the UK, Canada, Australia and NZ, commences on page 7.

Monkeys Multiply by 7

Roll the dice, add the numbers and multiply by 7.

a game for 2 players

Need: 2 dice, 2 different colored pencils

Each player uses a different colored pencil. Players take turns to roll the two dice and add the numbers together. The player then multiplies the total by 7 and colors this number in the game, e.g. if a player rolls 3 and 2, they color 35. The first player to color four in a line is the winner. The line can go across, down or diagonally.
